

Installing a Spiral Staircase

If you find the idea of installing your new staircase a daunting one, then fear not. All of our staircases come with step by step instructions and diagrams to guide you through it.

We try and make this as easy as possible by mock installing the majority of the staircases in our factory, before they go to the spray shop. This way we know that everything fits perfectly before it is despatched.

Any competent tradesman will be able to install our staircases but if they do get stuck, then feel safe in the knowledge our friendly and knowledgeable team are available to help.

Some of our staircases may require a small amount of welding on site. If this is not possible then we do have a no weld system we can use, please enquire about this when placing an order.

Alternatively we have an experienced team of fitters willing to travel reasonable distances from our Warwickshire base. Please contact us for more information.

Elite Spiral Stairs Profile

We are a family run engineering business based in rural Warwickshire and pride ourselves in manufacturing bespoke spiral staircases for the UK and Worldwide markets. Established in 1987 we hand make, made to measure, spiral staircases from genuine Cast Iron, Hardwood Timber, Steel, Stainless Steel and Wrought Iron. As the Elite name suggests we manufacture to the highest standards but at a sensible price.

Elite Spiral Stairs will not be beaten on price

In fact, If you can find a spiral staircase, of the same quality, at a lower price we will match the price and offer you free delivery!

Our experienced team are here to help; all you have to do is contact us. We can offer our expert advice on anything you're unsure about including passing building regulations. We offer a full design service in house, we can offer site surveys and we also have our own installation team.
